

MICRA II

The Micra II is a windproof microtent with robust materials.

Perfect use of space due to steep side walls. Unique are the two poles which cross each other twice for rigidity and windproofness.

Another long-time best seller in our range. A unique two pole design with two crossings increase headroom, but keep the groundsheet small. One huge rainproof entrance with two sliders form an additional ventilation when you need it, usable from the innertent.

Two side ventilations let the air flow and reduce effectively the condensation inside the tent. Big enough for two with little gear, or a very comfy tent for long-range adventures.
