

Tips for storage

Cleaning

- Before storing your caravan or motor home, always clean the waste-holding tank with **Cassette Tank Cleaner**. By cleaning the tank regularly, the moving parts will keep functioning properly, resulting in longer product life. Pour 300ml Cassette Tank Cleaner in a rinsed out tank and fill it up with at least 5L of lukewarm water. Shake the tank several times back and forth then set it down and leave for at least 16 hours. After emptying, your waste-holding tank will be as good as new. Allow the tank to dry by leaving the blade open.
- Driving with Cassette Tank Cleaner in the waste-holding tank will improve the cleaning performance.

During storage

During storage, we recommend that you leave the toilet blade open. By leaving the blade open, you prevent the blade seal from drying out. We also advise you to unscrew the cap of the pour out spout to keep the waste-holding tank ventilated.

Maintenance

To prevent waste-holding tank leakage, always keep the rubber seals smooth and lubricated by regularly using Thetford **Seal Lubricant**. Spray the seals and valves liberally with the Thetford Silicon Spray. Please note: unlike household silicone sprays, this spray is specially developed for Thetford toilets and plastic parts, and therefore absolutely safe to use.

Does your toilet have its own flush-water tank? Fully rinse this out so that no more deposits are left behind. Then empty it completely before parking your camper or caravan into storage. Depending on the type of toilet you own, you can easily let it run empty. For further questions and tips, please consult your manual.
